

Sweet Home

© April 2020 Meenakshi Mukerji, www.origamee.net

1. Crease halves and fold quarters. Turn over.

2. Fold edges to center, sliding back layer out.

3. Fold corners of pleats. Unfold.

4. Reverse fold corners using creases just made Turn over.

5. Fold the corners slightly offset from 45° (dotted).

6. Fold down as far as it will go.

7. Turn over.

8. Fold at 45°, but slightly offset from halfway point shown.

9. Fold tips down slightly.

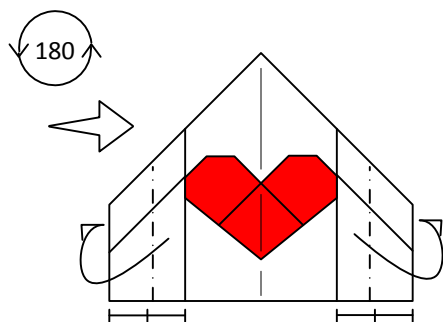

10. Fold top down to existing crease.

11. Fold bottom edge up and tuck under heart.

12. Pre-crease and then reverse fold.

13. Fold back to taste, a little more than the halfway points shown.

Sweet Home

Note: You can use the flaps folded back, for making the house stand, or tuck them in pleats behind to flatten completely.

Sweet Home 2

Start with completed Step 8 of Sweet Home, as on previous page.

9, 10. Fold top down at tip of heart behind, shown dotted. Next, make the crease in the bottom half. Turn over.

11. Fold edges a little more than the halfway points shown. Unfold.

12. Make the two 45° creases, folding only where shown. Turn over.

13. Pleat as shown.

14. Squash fold both sides.

15. Fold edge to level shown dotted. Then tuck it under the heart.

16. Pre-crease and reverse fold bottom corners.

17. Tuck top tips of heart under pleat or fold them back. Fold the sides back.

Sweet Home 2

Note: You can use the flaps folded back, for making the house stand, or tuck them in pleats behind to flatten completely.

A general note about both Sweet Home designs: Since a couple of steps involve folding to taste rather than using reference points, your home may end up looking a little different from what the figures show. But I like these minor differences - it's like you're planning your own home!

Variations

You can vary the location of the heart for Sweet Home by varying the level of the fold in Step 10. Examples below:

You can vary the shape of the roof for Sweet Home 2, by changing the reverse folds of Step 16 to include or not include the central part that is bounded by the pleats from Step 2.

You can also vary the height of the roof and the location of the heart for Sweet Home 2, by varying the level of the folds in Steps 9 and 10.
